

ZixMail™

Desktop email encryption

For the nation's most influential institutions, ZixCorp's Email Encryption Service is an important tool in the protection of sensitive data. Leading healthcare, financial, government and insurance organizations have turned to ZixCorp to help them meet mandatory regulatory requirements and protect customer privacy in all their email communications.

As part of ZixCorp's Email Encryption Service, ZixMail provides desktop email encryption that includes automated key management and delivery to anyone, anywhere through a secure web portal. It can be used with any corporate or web-based email system and optional plug-ins are available for full integration with Microsoft Outlook.

Send-to-anyone security

ZixMail makes it easy to securely send and receive confidential information. Encrypted messages are delivered using your existing email address, and a single ZixMail client can support multiple email addresses. ZixMail also provides time stamping and authentication for irrefutable proof of delivery and receipt.

If your recipient is not a ZixCorp customer, ZixMail will automatically send your email to ZixPort, a secure messaging portal that can be used to deliver secure emails to any address. ZixMail comes with full support for ZixMessage Center, ZixCorp's branded portal. You can also purchase your own branded ZixPort portal to reinforce your corporate identity. This is an excellent marketing tool that underscores your company's commitment to securing personal and private information.

Who uses ZixCorp's Email Encryption Service?

- Federal banking regulators (FFIEC)
- The Conference of State Bank Supervisors
- Members of the American Bankers' Association
- 30 Blue Cross Blue Shield organizations
- Health insurers protecting data for more than 70 million people
- More than 1,000 hospitals across the United States
- More than 600 financial institutions

BENEFITS:

- Fast, easy to install and simple to use
- Use with your current email system
- Automatic public key exchange through ZixDirectory™
- User-controlled operation
- Only the intended recipient can open the encrypted email

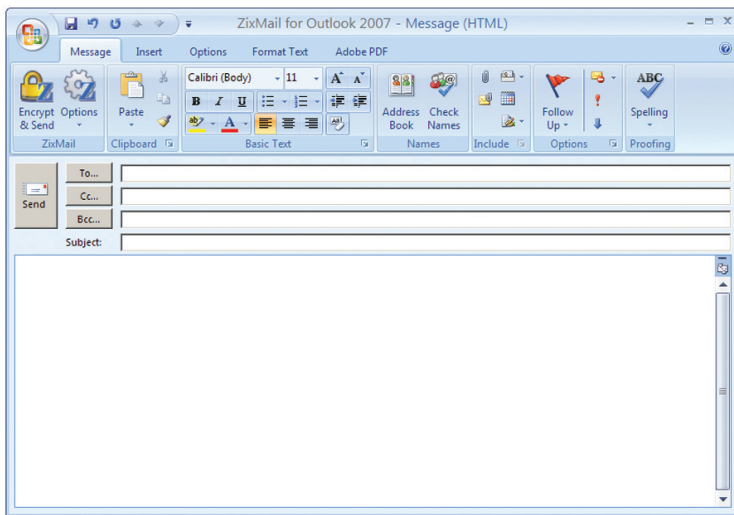

FEATURES:

- Time-stamping and authentication provide irrefutable proof of delivery and receipt
- Secure message storage
- Fully integrated versions for Microsoft Outlook
- Reinforcement of your corporate branding
- Integration with ZixPort for send-to-anyone capability

Outlook plug-ins

For Microsoft Outlook users, ZixCorp provides a special ZixMail plug-in so you can send and receive encrypted emails without ever leaving Outlook. The plug-in integrates the ZixMail functionality directly into Outlook's toolbar. The simple click of a button is all it takes to encrypt or decrypt a message.

Automated key management

ZixMail takes care of the most complicated aspect of using email encryption – key management. With ZixMail, all key management is handled through ZixDirectory, ZixCorp's hosted public key repository. More than 10 million members are included in ZixDirectory, allowing ZixMail users to automatically send and receive encrypted emails from other ZixMail or ZixVPM customers. No key set-up or exchange is necessary.

For a free 30-day trial, go to www.zixcorp.com/info/zixmail.

SYSTEM REQUIREMENTS:

- Windows 2000 / XP / Vista
- Pentium II or higher
- 64MB RAM

ABOUT ZIXCORP

ZixCorp provides easy-to-use-and-deploy email encryption and e-prescribing services that protect, manage and deliver sensitive information to the healthcare, finance, insurance and government industries. ZixCorp's hosted Email Encryption Service enables policy-driven email security, content filtering and send-to-anyone capability. Its PocketScript e-prescribing service provides point-of-care access and transmission of patient and payor data that improves patient care, reduces costs and improves efficiency.
